Re: NPDES Permit No.: IDG-37-0230, South Fork Clearwater River
Small Suction Dredge Mining
Miner number: 95

Dear Roberta Hendren:

This letter is to inform you that you are authorized to operate a small suction dredge in South Fork Clearwater River, at approximately 45.826824 N. Latitude, -115.505351 W. Longitude, near the city of Elk City, Idaho under the U.S. Environmental Protection Agency's (EPA) National Pollutant Discharge Elimination System (NPDES) General Permit for Small Suction Dredge Placer Miners in Idaho (General Permit). Please note that you are authorized to operate a suction dredge only in the receiving water(s) listed in this letter. If you plan to dredge in a different location, please submit a new Notice of Intent at least 60 days in advance of any planned dredging, and wait for written authorization from EPA before discharging at the new location.

You must keep a copy of this letter and the enclosed General Permit at the dredge site at all times. Enclosed are two copies of your "Miner Number" (95) which must be displayed on your dredge and in a vehicle near your dredge site. Authorization under this General Permit does not relieve you from the requirement to obtain a permit from the Idaho Department of Water Resources and/or from complying with any additional closures and timing restrictions.

Please note that an Endangered Species Act (ESA) opinion has been issued by both the U.S. Fish and Wildlife Service and NOAA Fisheries, pursuant to section 7 of the Act, on effects of the Small-Scale Suction Dredging in South Fork Clearwater River Project, proposed by the Nez Perce-Clearwater National Forests and Bureau of Land Management Cottonwood Field Office [*Section 7 Consultation for Suction Dredging on USFS and BLM Managed Lands on the South Fork Clearwater—Concurrence (Refer to: FWS Ref: 01EIFW00-2016-I-0597; CONS-100(a), NMFS No: WCR-2015-3013)*].

You must work with the Bureau of Land Management (BLM) to ensure that your operation is in compliance with the mitigation measures detailed in their ESA consultation documents; the BLM is responsible for enforcing these conditions¹. To contact the BLM Cottonwood Field Office about this requirement, please call Scott Sanner at (208) 769-5032. As a reminder, the South Fork Clearwater River is open to dredging between July 15 and August 15. Yours is one of only 15 operations allowed in the South Fork of the Clearwater River.

Please also note, you must comply with all of the requirements in the General Permit, including the monitoring and reporting requirements found in Part II.C. An Annual Report is due to the EPA at the following address by January 31 of each year for the previous year's activities:

¹ These measures will be incorporated into and required for the approval of every Plan of Operations.

US EPA Region 10
Attn: NPDES Compliance Unit, OCE-101
1200 Sixth Avenue, Suite 900
Seattle, WA 98101

The Annual Report must include all of the information found in Appendix B of the General Permit, or a report of "No Mining." A courtesy copy of the Annual Report form is enclosed and can also be found on our website at <http://yosemite.epa.gov/r10/water.nsf/npdes+permits/idsuction-gp>. Remember to provide a copy of your Annual Report to the appropriate Idaho Department of Environmental Quality Regional Office as well (Part III.B.).

This General Permit expires on December 31, 2016. If, prior to this time, you no longer need coverage under the General Permit, or you have a new mailing address, please inform the EPA so that we can properly document your inactivity and provide any reminders for reporting and/or renewing the General Permit.

Your activities may be subject to other local, state, and federal permits and certifications. This letter does not relieve you of your obligation to obtain all other appropriate permits and permission, including approval of your Plan of Operations by the USFS or BLM. If you have technical questions regarding this permit please contact Tracy DeGering in our Idaho Operations Office in Boise at degering.tracy@epa.gov or (208) 378-5756.

Sincerely,

for Tracy DeGering
Michael J. Lidgard, Manager
NPDES Permits Unit
